Verified Samples	Verified Samples in IHC: Human liver, Mouse bone, Human spleen Verified Samples in IF: Human liver
Dilution	IHC 1:500-1:1000, IF 1:200-1:500
Isotype	IgG
Host	Rabbit
Reactivity	Human, Mouse, Rat
Applications	IHC, IF
Clonality	Polyclonal
Immunogen	KLH conjugated Synthetic peptide corresponding to Mouse MPO
Abbr	MPO

Accept All

Cellular Localization	Lysosome
Concentration	0.81 mg/mL
Buffer	Phosphate buffered solution, pH 7.4, containing 0.05% stabilizer, 1% protein protectant and 50% glycerol.
Purification Method	Affinity purification
Research Areas	Cancer, Cardiovascular, Metabolism, Immunology
Conjugation	Unconjugated
Storage	Store at -20°C Valid for 12 months. Avoid freeze / thaw cycles.
Shipping	The product is shipped with ice pack,upon receipt,store it immediately at the temperature recommended.
background	Myeloperoxidase (MPO) is a heme protein synthesized during myeloid differentiation that constitutes the major component of neutrophil azurophilic granules.Produced as a single chain precursor, myeloperoxidase is subsequently cleaved into a light and heavy chain.The mature myeloperoxidase is a tetramer composed of 2 light chains and 2 heavy chains.This enzyme produces hypohalous acids central to the microbicidal activity of netrophils.
